## Willkommen bei Tampon-Technik

Tampon-Technik ist seit Jahren ausschließlich auf die Produktion von hochwertigen Drucktampons spezialisiert. Sie, verehrte Kunden, haben uns zu einem führenden Produzenten von Drucktampons in Deutschland werden lassen, dessen Geschäftskontakte von Australien bis in die USA reichen. Der Lück-Tampon, ist ein Synonym für Qualität. Dieser Erfolg basiert auf 3 Prinzipien:

- 1- individuelle Kundenberatung von erfahrenen Fachleuten
- 2- absolute Qualität
- 3- kurzfristige Lieferzeiten.

Wir bieten Lösungen für den wirtschaftlichen Einsatz von Drucktampons:

- auf rauen Oberflächen
- auf leicht zerbrechlichen Material
- als Mehrfarbendruck
- in sehr kleinen Aussparungen
- auf unebenen Produkten

Jahrzehntelange Berufserfahrung im Druckgewerbe prägen unsere Beratung. Wir setzen Ihre Erwartungen um und machen das Machbare möglich. (Falls nötig selbst vor Ort) Nutzen Sie unser Know-How und stellen Sie fest, dass die Tampon-Druck-Technologie eine wirtschaftliche Alternative zu anderen Druck-Technologien sein kann. Wir beraten Sie in jedem Fall gern.

## Welcome to Tampon-Technik

For years Tampon-Technik is exclusively specialised in the production of high quality printing pads. Thanks to you, dear customer, we have become one of the leading manufacturers of printing pads in Germany. Our business contacts reach from Australia to the USA. The Lück printing pad is a synonym for quality. This success is based on 3 principals:

- 1- Individual customer advisory by experienced experts
- 2- Highest quality
- 3- Short delivery term.

We offer solutions for a profitable use of printing pads:

- On rough surfaces
- On extreme fragile materials
- As multicolour printing
- In cavities
- On uneven products

Decades of professional practise in the printing branch set the tone of our advisory service. We implement your expectations and make feasible tasks possible (if necessary at your site). Make use of our know-how and find out that the printing pads technology presents an economical alternative to other printing methods. We look forward to offering you our advisory services.

## Hochleistungs-Drucktampons

*Lück-Tampons*® werden aus hochwertigen Rohstoffen hergestellt. Diese garantieren:

- höchste Druckqualität
- höchste mechanische Dauerbeanspruchung
- langfristige Konstanz der Shore-Härte
- keine Zersetzung bei aggressiven Farben

Alternativ zu unserem empfehlenswerten roten Material bieten wir an:

- weiße Qualität  
ermöglicht ein besseres Erkennen des Druckbildes auf dem Stempel
- schwarze und blaue Qualität  
besitzen ein geringeres statisches Aufladungspotential
- gelbe Qualität  
eignet sich zur manuellen Nachbearbeitung des Drucktampons (z.B. Beschneiden) und zeichnet sich durch ein brillantes Druckbild aus

## Härtegrade

*Lück-Tampons*® werden in allen gängigen Härtegraden produziert. Die technische Untergrenze liegt bei ca. 25 Shore 00. Die mittleren Shore A Härten nach DIN 53505 können wir stufenlos bis ca. 25 Shore A anbieten. Härtebereiche oberhalb dieser Spanne (z.B. für Silikonwalzen) liefern wir auf Anfrage.

## Oberfläche

*Lück-Tampons*® werden mit verschiedenen Oberflächenbeschaffenheiten angeboten. Das Spektrum reicht von supertrocken (z.B. für Metalldruck) bis superfeucht (für dickeren Farbauftrag). Auf Wunsch stellen wir auch Zwischenwerte und Extremoberflächen her. Sollten Sie keine speziellen Angaben machen, erhalten Sie die bevorzugte normale Oberfläche.

## Sonderwünsche

Die *Lück-Tampon*® Produktpalette wird ständig den neuesten technischen Anforderungen angepasst und erweitert. Sie umfaßt zur Zeit ca. 1000 verschiedene Tamponformen, welche nicht alle im Katalog dargestellt werden konnten. Falls Sie einen Tampon benötigen, der nicht im Katalog aufgeführt ist, liefern wir diesen selbstverständlich auf Anfrage. Natürlich produzieren wir auch Sondertampons, die speziell auf Ihre Anforderungen abgestimmt sind.

Am Ende des Kataloges finden Sie ein  
**Bestellformular**  
zur schnellen Auftragsübermittlung (z.B.Fax)

## High-performance printing pads

Lück printing pads are mainly fabricated out of high-grade red raw materials. They guarantee:

- highest printing quality
- highest mechanic continuous stress
- long-term constancy of shore hardness
- no decomposition due to aggressive colors

Of course we offer also other qualities if desired:

- white quality  
enables to a better recognition of the printing format on the pad
- black and blue quality  
have a lower static charging potential
- yellow quality  
is suitable for manual finishing of the printing pad (e.g. trimming) and is characterised by a brilliant printing format.

## Degree of hardness

Lück printing pads are produced in all marketable degrees of hardness. The technical lower limit lies at approx. 25 shore 00. We can offer mid shore A hardness`s according to DIN 53505 infinitely variable up to ca. 25 shore A. Hardness`s which exceed this range (e.g. for silicone rollers) can be delivered on request.

## Surface

Lück printing pads are offered with varying surface structures and qualities reaching from extra dry (e.g. for metal-printing) to extreme humid (for thicker colour application). On request we also produce intermediate values and extreme surfaces. In case you do not communicate to us your particular specification we provide the most favourable normal surface.

## Options

The Lück printing pads product range is constantly adjusted and extended according to the latest technical requirements. At present we can offer about 1000 different printing forms - impossible to present them all in our brochure. In case you need a printing pad not shown in our brochure it goes without saying that we will supply it on your request. Of course we also produce special pads designed for our customer`s requirement only.

At the end of our catalogue you will find an  
**ORDER FORM**  
for fast order transmission (e.g.fax)

# LÜCK®

## TAMPON

### Hohle Drucktampons

Alle *Lück-Tampons*® können prinzipiell hohl gefertigt werden. Aus diesem Grund haben wir verzichtet, diese in den Katalog aufzunehmen. Anhand der Preisliste können Sie erkennen, welche Tampons schon jetzt hohl angeboten werden.

Die Drucktampon Nr.: 142H30 bedeutet zum Beispiel, dass in dem Drucktampon Nr. 142 sich ein Hohlkörper in der Grösse des Drucktampon Nr. 30 befindet. Sämtliche Drucktampons deren Nummer ein H beinhaltet sind hohl. Auf Wunsch fertigen wir kurzfristig Ihren *Lück-Tampon*® hohl an.

### Auswahlkriterien

Die Grössenauswahl des Drucktampons ist abhängig vom Druckbild und dem Grad der Deformation des Drucktampons beim Druckvorgang.

Die Härteauswahl des Drucktampons ist abhängig von der Form des Druckgutes und der gewünschten Druckqualität.

Weiche Drucktampons verfügen über einen dickeren Farbauftrag. Sie passen sich stark gebogenen Teilen gut an und neigen zur homogenen Farbverteilung. Dieser Aspekt kann zum gleichmäßigen Farbauftrag auf Vollflächen und Strukturflächen genutzt werden. Nachteilig ist ihr eher unsauberes Druckbild und die verstärkte Neigung zu Lufteinschlüssen.

Harte Drucktampons verfügen über ein sauberes Druckbild, insbesondere auf Strukturoberflächen. Es bilden sich weniger Lufteinschlüsse. Nachteilig ist der geringere Farbauftrag, sowie die nur bedingte Eignung auf stark gewölbten Teilen.

Hohle Drucktampons unterstützen das Drucken auf sehr stark gebogenen Teilen.

### Behandlung und Pflege

Die *Lück-Tampons*® am besten mit weichem, Alkohol oder Verdünner getränkten Reinigungspapier abreiben, bis die Oberfläche matt ist. Die Oberfläche kann durch trocken reiben oder den Einsatz der Handfläche beschädigt werden (Radiergummi-Effekt). Der Drucktampon kann sich bei längerem Dauereinsatz plastisch verformen. Hier empfiehlt es sich, den Tampon rechtzeitig auszutauschen. Diese Verformungen sind reversibel und bilden sich nach mehreren Stunden zurück.

### Umweltverträglichkeit

*Lück-Tampons*® gewährleisten bedenkenlos einen lebensmittelechten Druck. Verbrauchte Druckstempel können Sie unproblematisch über den Restmüll entsorgen.

### Hollow printing pads

On principal all Lück printing pads can be fabricated as hollow types. Therefore, we refrained from giving them a place in our catalogue. The price list clearly shows which printing pads are already now available as hollow pads.

For example printing pad no.: 142H30 means that printing pad no. 142 includes a hollow body with the size of printing pad no. 30. All printing pads with an article number that includes an H are hollow. On request we fabricate on short term your hollow Lück printing pad.

### Selection criteria

Selection of the printing pad size depends on the printing format and the degree of deformation of the printing pad during the printing process.

Selection of hardness depends on the form of the goods to be imprinted and the desired printing quality.

Soft printing pads provide a thicker color application. They adapt themselves enormously to bent parts and tent to an homogenous color distribution. This aspect can be used for an even color application onto all-over surfaces and structural surfaces. Disadvantageous is their rather unclean format and the improved tendency to inclusions of air.

Hard printing pads provide a clean printing format, in particular on structural surfaces, and less inclusions of air occur. On the other hand the disadvantage is that less color is applied and that the pads are less suitable for strongly curved parts. Here hollow printing pads can support the print onto strongly bent parts.

### Treatment and care

The best method is to rub Lück printing pads with soft cleaning paper soaked with alcohol or diluent until the surface becomes matt. The surface can be damaged through dry rubbing or use of the hands palm (rubber effect). The printing pad can deform plastically when using it permanently. Here we recommend to exchange the pad early enough. These deformations are reversible and return to their original form after a few hours.

### Environmental aspects

Without hesitating Lück printing pads guarantee food-suitable printing. Utilized printing pads can be disposed of with the normal garbage.

## Walzen und Druckwalzen

finden Sie in unserer Preisliste für Walzen. (ca. 150 verschiedene Modelle)

Die Bezeichnungen L,D,K bedeuten Silikonlänge, Gesamtdurchmesser und Durchmesser des Kernes.

Die Walzenkerne werden in der Regel vom Kunden gestellt.

Die Härte des Silikons kann stufenlos bis 70 Shore A gewählt werden. Darüber hinaus auf Anfrage. Der Härte-Standard liegt bei 40 Shore A.

Reinigungswalzen sollten eine superfeuchte Oberfläche aufweisen, um eine bessere Reinigungswirkung zu erzielen. Der Härte-Standard liegt bei 5 Shore A.

Für Etikettendrucker bieten wir ein spezielles Antihaft-Material an.

Gebrauchte Alu-Kerne von Druckwalzen können problemlos aufgearbeitet und wiederverwendet werden.

Vorhandene Walzenformen können kostengünstig auf Ihren Walzenkern angepasst werden.

## Rollers and Printing Rollers

Please find the about 150 different types of rollers and printing rollers in our roller price list.

The designations L, D, K stand for silicone length, complete diameter and diameter of the core.

Usually the customer indicates the roller's core.

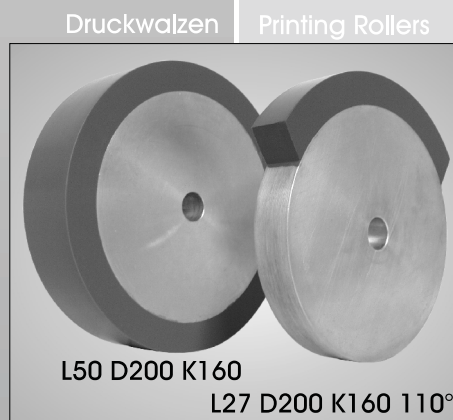

Hardness of the silicone can be chosen infinitely up to 70 shore A. Hardness's exceeding this value can be delivered on request. Hardness standard lies at 40 shore A.

Stripper rollers should have a very humid surface to achieve a better cleaning effect. Hardness standard lies at 5 shore A.

We offer a special anti-sticking product for label printers.

Used printing roller alu-cores can without problems be regenerated and used again.

Existing roller forms can at low cost be adjusted to you roller core.

## Zubehör

### Stahlklischees

In unserer Preisliste bieten wir Stahlklischees in den Abmessungen von 30x70 mm bis 200x300 mm in 10 mm Stärke an. (Sondergrößen auf Anfrage)

Das Stahlklischee besteht aus einem hochwertigen gehärteten Spezialstahl dessen Härtegrad bei ca. 63 HRC liegt. Die Rauhtiefe beträgt ca. 1  $\mu\text{m}$ .

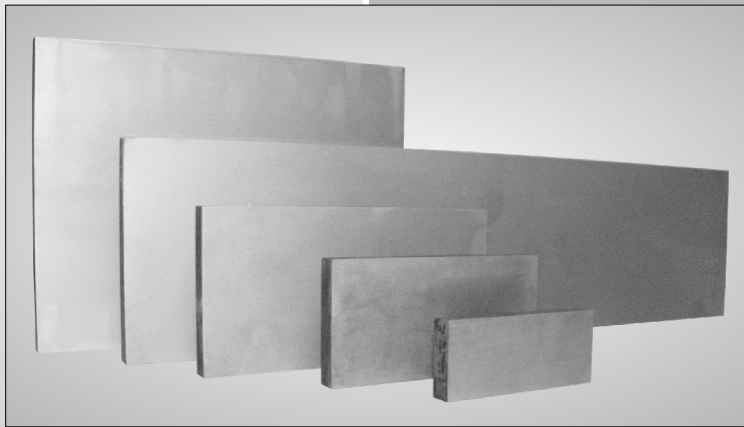

Vorteile:

beste Druckqualität, äußerst Verschleißarm (min. 1 Million Raketungen - bei sachgerechtem Umgang)

Nachteile:

höherer Preis

Für die Ätzung benötigen wir einen reprofähigen Film (Schichtseite unten) bzw. Daten zur Erstellung eines Filmes. Ferner benötigen wir die gewünschte Ätztiefe (Empfehlung: Bei geschlossenen Drucksystemen ca. 19  $\mu\text{m}$ , bei offenen Drucksystemen ca. 23  $\mu\text{m}$ )

### Blechklichees

Unser Angebot an Blechklichees reicht von den Grössen 50x50mm bis 200x600mm (Preisliste)

Das Material besteht aus 0,5mm starkem Federbandstahl, dessen Härte bei ca. 52-54 HRC liegt.

Vorteile: geringerer Preis als Stahlklischees

Nachteile: höherer Verschleiß

Ätzung: siehe Stahlklischees

### Kunststoffklischees

Die Grössenauswahl der Kunststoffklischees Typ ST 52 reicht von 30x70mm bis 250x250mm (Preisliste).

Sie besitzen eine Gesamtstärke von 0,52mm. Die Kunststoffklischees sind unbelichtet und alkoholauswaschbar. Die Ätztiefe ist abhängig von Belichtungszeit und Rasterweite. Eine Verpackungseinheit beinhaltet 10 Kunststoffklischees.

Vorteile:

schnelle Einsatzbereitschaft, geringster Preis

Nachteil:

hoher Verschleiß

Kunststoffklischees eignen sich hauptsächlich für kleinere Auflagen, Andrucke, Vorserien und eilige Aufträge.

## ACCESSORIES

### Steel printing clichés

In our price list we offer steel printing clichés with dimensions from 30 x 70 mm up to 200 x 300 mm with a thickness of 10 mm (special sizes on your request).

The steel printing clichés consists of high quality hardened special steel with a hardness degree of approx. 63 HRC. The peak-to-valley height is ca. 1  $\mu\text{m}$ .

Advantages:

Highest printing quality, extremely resistant to wear (ca. 1 million applications at appropriate use).

Disadvantages:

Higher price

For engraving we need a reproducible film (sensitised face down) or data for the production of a film. Further we need the required depth of engraving (recommendation: for closed printing systems ca. 19  $\mu\text{m}$ , for open printing systems ca. 23  $\mu\text{m}$ )

### Sheet metal printing clichés

Our range of sheet metal printing clichés reaches from the size of 50 x 50 mm to 200 x 600 mm (price list). The material consists of 0,5 mm thick spring band steel with a hardness of ca. 52-54 HRC.

Advantages: Less expensive than steel printing clichés

Disadvantages: Higher rate of wear

Engraving: see steel printing clichés

### Plastic printing clichés

The range of sizes of our plastic printing clichés type ST 52 reaches from 30 x 70 mm to 250 x 250 mm (price list).

They have a thickness of 0,52 mm. The plastic printing blocks are raw and washable with alcohol. The depth of the engraving depends on the exposure time and screen width. One packing unit contains of 10 plastic printing clichés.

Advantages:

Fast application possible

Disadvantage:

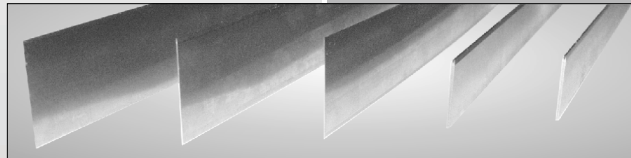

Higher rate of wear

Plastic printing block are mainly suitable for small editions, proof printing, pilot runs and urgent orders.

## Rakelmesser

Rakelmesser für Stahlklischees bestehen aus gehärtetem Federbandstahl und sind beidseitig geschliffen. Unser Angebot umfasst eine Materialstärke von 0,5 mm bei einer Höhe von 19mm. Die Längen der Rakelmesser variieren von 40mm bis 530mm (Preisliste). Andere Maße liefern wir auf Anfrage.

Rakel für Kunststoffklischees (Tiefdruckrakel) bestehen aus gehärtetem Federbandstahl und sind einseitig geschliffen. Unser Angebot umfasst eine Materialstärke von 0,2mm bei einer Länge von 1000mm. Die Höhen der Tiefdruckrakel variieren von 20mm bis 30mm (Preisliste). Andere Maße liefern wir auf Anfrage.

## Doctor blades

Doctor blades for steel printing clichés consist of a hardened spring band steel and are grind on both sides. We offer material thicknesses from 0,5 mm at a height of 19 mm. The lengths of the doctor blades vary from 40 mm to 530 mm (price list). Other measures are available on request.

Doctor blades for plastic printing clichés (gravure printing) consist of hardened spring band steel and are grind on one side. We offer a material thickness of 0,2 mm at a length of 1000 mm. The gravure printing heights vary from 20 mm to 30 mm (price list). Other measures are available on request.

## Sonstiges

Tamponpflegespray, 200ml  
(unterstützt die Rückbildung von Verformungen des Tampons, schützt die Oberfläche des Drucktampons, z.B. Einlagern)

Tamponpflegeöl, 1l  
(wird per Hand auf den Drucktampon aufgetragen - unterstützt die Rückbildung von Verformungen des Tampons, schützt die Oberfläche des Drucktampons z.B.)

Silikonkleber, 90ml Tube

Auswaschmittel für alkoholauswaschbare Kunststoffklischees, 5l Gebinde

Erstellen Sie selbstständig Ihre Filme mit Hilfe von Laserfolien für Laserdrucker (100 Blatt) und Tonerverdichter für Laserdrucker (400ml).

## Other accessories

Printing pad maintenance spray, 200 ml  
(supports regeneration of pad deformations, protects the pad surface, e.g. for storage)

Printing pad maintenance oil, 1l  
(is applied manually onto the printing pad – supports regeneration of pad deformations, protects the pad surface).

Silicone glue, 90 l tube

Solvent for plastic printing clichés to be washed out with alcohol, 5 l drum

Produce your films yourself with laser foils for laser printers (100 sheet) and toner condenser for laser printer (400 ml).

Anzahl	Tampon Nr.	Farbe	Härte	Gewinde	Oberfläche

**Farbe:** rote Qualität (Standard – höchste Druckqualität, höchste mechanische Dauerbeanspruchung, langfristige Konstanz der Shore-Härte), weiße Qualität (bessere Erkennung des Druckbildes auf dem Stempel), schwarze und blaue Qualität (geringeres statisches Aufladungspotential), gelbe Qualität (bessere manuelle Nachbereitung des Tampons z.B. Beschneiden)

**Härte:** Sie können stufenlos von 25 Shore 00 bis ca. 25 Shore A bei uns bestellen. (z.B. 1 Shore A = weich, 6 Shore A = mittel, 12 Shore A = hart)

**Gewinde:** auf Wunsch liefern wir die Schichtholz Tampon-Träger mit M6 Gewindeeinsätzen, je nach Größe des Tampon-Trägers sind auch mehrere Gewindeeinsätze sinnvoll.

**Oberfläche:** neben der häufig bevorzugten normalen Oberflächenbeschaffenheit, bieten wir auch supertrocken, trocken (z.B. für Metalldruck), als auch feucht und superfeucht (für dickeren Farbauftrag-Vorsicht Anlaufschwierigkeiten) an.

Beispiel:

Anzahl	Tampon Nr.	Farbe	Härte	Gewinde	Oberfläche
5	Nr. 13K	rot	6 Shore A	1 x M6	trocken
8	Nr. 535 Alu M6	rot	8 Shore A

Quantity	Printing pad number	Color	Hardness	Thread	Surface

**Color:** Red quality (standard-highest printing quality, highest mechanic continuous stress, long-term constancy of shore hardness), white quality (better recognition of the printing format on the pad), black and blue quality (lower static charging potential), yellow quality (suitable for manual finishing of the printing pad, e.g. trimming)

**Hardness:** You can order an infinitely variable hardness from 25 shore 00 up to ca. 25 shore A (e.g. 1 shore A = soft, 6 shore A = middle, 12 shore A = hard)

**Thread:** If desired we supply the printing support out of laminated wood with M6 thread-inserts, according to size of the pad support also several thread-inserts can be useful

**Surface:** In addition to the often preferred normal surface structure we offer both super dry, dry (e.g. metal-printing) and humid, super humid surfaces (for thicker colour application – Warning : starting difficulties).

Example:

Quantity	Printing pad number	Color	Hardness	Thread	Surface
5	No. 13K	red	6 Shore A	1 x M6	dry
8	No. 535 Alu M6	red	8 Shore A

## Beispiele für die Anwendung von Lück-Tampons® References for the use of Lück-Tampons®

### Peugeot-Löwe

Die Firma Linden GmbH & Co. KG verwendet den Lück-Tampon Nr. 34 zum Bedrucken des Peugeot Emblems. Die Tampon-Form ist den Vertiefungen des Druckgutes exakt angepasst.

### Peugeot-Lion

The company Linden GmbH & Co. KG uses the Lück printing pad number LP34 for printing the Peugeot logo. The pad is adjusted precisely to the cavities of the material to be printed.

### Popsy-Flaschenverschluss

Dieser Flaschenverschluss der Firma Krugmann Markenspirituosen wird im Tampondruck dekoriert. Gerade durch die unsymmetrisch gewölbte Oberfläche bleibt dieses Druckverfahren als technische Lösung der Favorit. Eingesetzt wird der Drucktampon Nr. 509 in 3 Shore A.

### Popsy-Bottle cap

This bottle cap of company Krugmann Markenspirituosen is decorated by means of pad printing. This kind of printing is the most advanced technical solution, in particular due to the non symmetric surface. We use printing pad no. 509 with 3 shore A.

### MAPA Beruhigungssauger

NUK Beruhigungssauger der Firma MAPA GmbH werden mit dem Lück-Tampon Nr. 468 in 12 Shore A bedruckt. Die Aussparung wurde dem Schaft des Druckgutes angepasst. MAPA – calming dummies

### MAPA – calming dummies

NUK calming dummies of company MAPA GmbH are printed with the Lück printing pad number 468 in 12 shore A. The empty space was precisely adjusted to the staff of the object to be printed.
